

SAHAJPAL SINGH

Cloud Engineer | AWS Certified SysOps Administrator | DevOps Engineer

+91 8941998996 o sahajpal1905@gmail.com o linkedin.com/in/sahajshj o github.com/Sahajshj o Uttarakhand, India

SUMMARY

AWS Certified SysOps Administrator and Cloud Engineer with 1+ year of experience designing, automating, and managing infrastructure using Terraform, Docker, Kubernetes, and CI/CD pipelines. Skilled in Infrastructure as Code (IaC), AWS EKS, Helm deployments, Linux administration, cloud monitoring with Prometheus and Grafana, and deployment automation. Experienced in implementing scalable cloud-native solutions while improving reliability, security, and operational efficiency.

EXPERIENCE

STGi (The Summit Group)

Developer & Cloud Engineer

Panchkula, India

May 2025 - May 2026

Provider of cutting-edge technology and professional services to federal customers across health, IT, and education sectors.

- Engineered and maintained 10+ Terraform IaC modules for AWS environments, reducing manual provisioning time by 40%.
- Updated 5+ Terraform registry modules, IAM policies, and security rules, improving compliance coverage across environments.
- Led Terraform v6 migration and AWS EKS (Kubernetes) configuration updates, reducing deployment failures by 30% and improving cluster stability.
- Reviewed and merged 20+ infrastructure Pull Requests through GitHub Actions CI/CD pipelines, maintaining a 0-downtime deployment record.
- Configured Datadog monitoring and alerting dashboards, improving incident detection and mean time to resolution (MTTR).
- Built and maintained 3+ frontend features for a multi-tenant Loan Origination System using Vue.js, serving 500+ users.
- Collaborated with backend engineers and QA teams to resolve 15+ production issues, improving workflow usability by 25%.

EDUCATION

Chitkara University

B.Tech in Computer Science & Engineering

CGPA: 8.44

2022 - 2026

CBSE (Class XII)

Science Streams, Schooling

93.8%

2020 - 2021

CBSE (Class X)

Schooling

90.4%

2018 - 2019

CERTIFICATIONS

AWS Certified SysOps Administrator - Associate

Amazon Web Services | 2024 | No Expiry

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, S3, IAM, VPC, CloudWatch, EKS), Terraform, Infrastructure as Code (IaC), Kubernetes, Helm, Docker

CI/CD & Automation: GitHub Actions, CI/CD Pipelines, Bash Scripting, YAML, Git

Monitoring & Observability: Datadog, Prometheus, Grafana, CloudWatch

Backend & Frontend: Node.js, MongoDB, Vue.js, JavaScript, C#, RESTful APIs, JWT Authentication

Operating Systems: Linux (Ubuntu, Amazon Linux), Windows Server

AWARDS & ACHIEVEMENTS

RoboSprint - 1st Place

Ranked 1st out of 50+ teams - built a robotics-based environmental cleaning solution.

Kalp Build Hackathon Winner

Won among 100+ participants, delivering a blockchain voting system and securing INR 10,000.

Blue Marble Study Program

Selected among 28 students globally for the Blue Marble Study Program at Deakin University.

PROJECTS

Uplift - Mental Health Platform

2024

Mental health platform providing doctor consultation and community engagement features.

- Expanded backend services with 8+ RESTful APIs using Node.js and MongoDB, supporting scalable data management.
- Implemented JWT-based authentication, reducing unauthorized access attempts by 100% in testing.

Social Media Application

2024

Instagram-inspired social media application with full post and interaction system.

- Enhanced 5+ backend microservice modules including posts, likes, comments, and user management supporting 200+ concurrent users.

River Cleaning Robot

2023 - 2024

Automated robot solution addressing water pollution using embedded hardware.

- Improved autonomous debris detection to 85% accuracy using Arduino Uno and Raspberry Pi for environmental sustainability.
